

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

**Original Adoption: September 12, 2016**

**Created By: Kevin Waldron-Berkeley, Jamie Pratt-Brick, Cathy McBride-Long Beach Island, Christine Manna-Toms River**

**Revised on: December 16, 2019**

**Revised by: Stephanie Konsig, Deb Harkness**

**Proposed Revision Date: Summer 2021**

### Recommended Pacing Guide

<b>Unit 1: Engineering</b>	<b>40 days- ongoing</b>
<b>Unit 2: Forces &amp; Motion</b>	<b>30 days- ongoing</b>
<b>Unit 3: Life Cycles &amp; Inherited Traits</b>	<b>40 days- ongoing</b>
<b>Unit 4: Organisms and Their Environments</b>	<b>40 days- ongoing</b>
<b>Unit 5: Weather &amp; Patterns</b>	<b>30 days- ongoing</b>

### Suggested Accommodations

#### **English Language Learners:**

- Provide pictures and well labeled models
- Speak slowly and gesture when necessary
- Pre-teach vocabulary words
- Extended time on assessments
- Small group for assessment
- Review Vocabulary
- Allow for alternate responses during activities and assessments

#### **Special Education/Students with Disabilities:**

- Follow specific IEP accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

#### **504 Plans:**

- Follow specific 504 accommodations and modifications
- Strategic grouping
- Pre-teach concepts

- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**Gifted and Talented:**

- Open ended questions to activate higher level thinking
- Higher level texts
- Alternative modes of communication
- Student developed extension activities
- Plan self directed inquiry
- Student created rubrics
- Curriculum compacting
- Opportunities to push assessment/activity boundaries

**Students at Risk of Failure:**

- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Incorporate social/emotional discussions
- Encourage and monitor positive peer collaboration
- Provide academic resources for both home and school use
- Provide incentives to increase motivation and collaboration

**Economically Disadvantaged:**

- Provide clear, achievable expectation, do not lower academic requirements for them.
- Build a safe and nurturing atmosphere
- Be flexible with assignments
- Offer several alternatives from which all students can choose.
- Allow students to finish assignments independently, or give them the opportunity to complete tasks at their own pace.
- Use real-world examples and create mental models for abstract idea
- Provide increased knowledge base and vocabulary use about real world experiences.
- Share the decision making in class.
- Maintain expectations while offering choice and soliciting input

**Culturally Diverse:**

- Involve families in student learning
- Provide social/emotional support
- Respect cultural traditions
- Build in more group work to encourage interaction with peers
- Show photos, videos, and definitions when possible for culturally unique vocabulary
- Teach study skills
- Provided students with necessary academic resources and materials
- Allow for alternative assignments
- Provide visuals
- Assign peer tutor
- Support verbal explanations with non verbal cues: Gestures/ facial expressions Props, realia, manipulatives, concrete materials Visuals, graphs, pictures, maps
- Provide positive praise to increase motivation
- Provide real world connections and emphasize the value of education

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

- Communicate high expectations for the success of all students

**Unit 1: Engineering**

**Duration: September-October**

### Standards/Learning Targets

**New Jersey Student Learning Standards:**

- **ETS1.A:** Defining and Delimiting Engineering Problems
- **ETS1.B:** Developing Possible Solutions
- **ETS1.C:** Optimizing the Design Solution

### Performance Expectation

**K-2- ETS1-1.** Ask questions, make observations, and gather information about a situation people want to change to define a simple problem that can be solved through the development of a new or improved object or tool.

#### Science and Engineering Practices

#### Disciplinary Core Ideas

**Asking Questions and Defining Problems-**

- Ask questions based on observations to find more information about the natural and/or designed world(s).
- Define a simple problem that can be solved through the development of a new or improved object or tool.

**ETS1.A: Defining and Delimiting Engineering Problems-**

- A situation that people want to change or create can be approached as a problem to be solved through engineering.
- Asking questions, making observations, and gathering information are helpful in thinking about problems.
- Before beginning to design a solution, it is important to clearly understand the problem.

#### Crosscutting Concepts

#### Learning Objectives

**Structure and Function**

- The shape and stability of structures of natural and designed objects are related to their function(s).

- Students ask questions and make observations to gather information about a situation that people want to change. Students' questions, observations, and information gathering are focused on:
  - A given situation that people wish to change.
  - Why people want the situation to change.
  - The desired outcome of changing the situation.
- Students' questions are based on observations and information gathered about

-------------------------	------------------------------

<p><b>Planning and Carrying Out Investigations-</b></p> <ul style="list-style-type: none"> <li>Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered.</li> </ul> <p><b>Scientific Investigations Use a Variety of Methods-</b></p> <ul style="list-style-type: none"> <li>Science investigations use a variety of methods, tools, and techniques.</li> </ul>	<p><b>PS2.A: Forces and Motion-</b></p> <ul style="list-style-type: none"> <li>Each force acts on one particular object and has both strength and a direction. An object at rest typically has multiple forces acting on it, but they add to give zero net force on the object. Forces that do not sum to zero can cause changes in the object’s speed or direction of motion. (Boundary: Qualitative and conceptual, but not quantitative addition of forces are used at this level.)</li> </ul> <p><b>PS2.B: Types of Interactions-</b></p> <ul style="list-style-type: none"> <li>Objects in contact exert forces on each other.</li> </ul>
---	--

<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
------------------------------	----------------------------

<p><b>Cause and Effect-</b></p> <ul style="list-style-type: none"> <li>Cause and effect relationships are routinely identified.</li> </ul>	<ul style="list-style-type: none"> <li>Students identify and describe the phenomenon under investigation, which includes the effects of different forces on an object’s motion (e.g., starting, stopping, or changing direction).</li> <li>Students describe the purpose of the investigation, which includes producing data to serve as the basis for evidence for how balanced and unbalanced forces determine an object’s motion.</li> <li>Students collaboratively develop an investigation plan. In the investigation plan, students describe the data to be collected.</li> <li>Students individually describe how the evidence to be collected will be relevant to determining the effects of balanced and unbalanced forces on an object’s motion.</li> <li>In the collaboratively developed investigation plan, students describe how the motion of the object will be observed and recorded</li> </ul>
--	--

<b>Performance Expectation</b>
--------------------------------

**3-PS2-2-** Make observations and/or measurements of an object’s motion to provide evidence that a pattern can be used to predict future motion. [Clarification Statement: Examples of motion with a predictable pattern could include a child swinging in a swing, a ball rolling back and forth in a bowl, and two children on a seesaw.] [Assessment Boundary: Assessment does not include technical terms such as period and frequency.]

**Beach Haven School District Curriculum Guide**

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
<p><b>Planning and Carrying Out Investigations-</b></p> <ul style="list-style-type: none"> <li>• Make observations and/or measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon or test a design solution.</li> </ul> <p><b>Science Knowledge is Based on Empirical Evidence-</b></p> <ul style="list-style-type: none"> <li>• Science findings are based on recognizing patterns.</li> </ul>	<p><b>PS2.A: Forces and Motion-</b></p> <ul style="list-style-type: none"> <li>• The patterns of an object’s motion in various situations can be observed and measured; when that past motion exhibits a regular pattern, future motion can be predicted from it. (Boundary: Technical terms, such as magnitude, velocity, momentum, and vector quantity, are not introduced at this level, but the concept that some quantities need both size and direction to be described is developed</li> </ul>

<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
<p><b>Patterns-</b></p> <ul style="list-style-type: none"> <li>• Patterns of change can be used to make predictions.</li> </ul>	<ul style="list-style-type: none"> <li>• From the given investigation plan, students identify and describe the phenomenon under investigation, which includes observable patterns in the motion of an object.</li> <li>• Students identify and describe the purpose of the investigation, which includes providing evidence for an explanation of the phenomenon that includes the idea that patterns of motion can be used to predict future motion of an object.</li> <li>• Based on a given investigation plan, students identify and describe the data to be collected through observations and/or measurements, including data on the motion of the object as it repeats a pattern over time (e.g., a pendulum swinging, a ball moving on a curved track, a magnet repelling another magnet).</li> <li>• Students describe how the data will serve as evidence of a pattern in the motion of an object and how that pattern can be used to predict future motion.</li> <li>• From the given investigation plan, students identify and describe how the data will be collected</li> </ul>

<b>Performance Expectation</b>
--------------------------------

**Beach Haven School District Curriculum Guide**

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

**3-PS2-3-** Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other. [Clarification Statement: Examples of an electric force could include the force on hair from an electrically charged balloon and the electrical forces between a charged rod and pieces of paper; examples of a magnetic force could include the force between two permanent magnets, the force between an electromagnet and steel paper clips, and the force exerted by one magnet versus the force exerted by two magnets. Examples of cause and effect relationships could include how the distance between objects affects strength of the force and how the orientation of magnets affects the direction of the magnetic force.] [Assessment Boundary: Assessment is limited to forces produced by objects that can be manipulated by students, and electrical interactions are limited to static electricity.]

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
<p><b>Asking Questions and Defining Problems-</b></p> <ul style="list-style-type: none"> <li>Ask questions that can be investigated based on patterns such as cause and effect relationships.</li> </ul>	<p><b>PS2.B: Types of Interactions-</b></p> <ul style="list-style-type: none"> <li>Electric and magnetic forces between a pair of objects do not require that the objects be in contact. The sizes of the forces in each situation depend on the properties of the objects and their distances apart and, for forces between two magnets, on their orientation relative to each other.</li> </ul>
<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
<p><b>Cause and Effect-</b></p> <ul style="list-style-type: none"> <li>Cause and effect relationships are routinely identified, tested, and used to explain change.</li> </ul>	<ul style="list-style-type: none"> <li>Students ask questions that arise from observations of two objects not in contact with each other interacting through electric or magnetic forces, the answers to which would clarify the cause and effect relationships between:                             <ul style="list-style-type: none"> <li>The sizes of the forces on the two interacting objects due to the distance between the two objects.</li> <li>The relative orientation of two magnets and whether the force between the magnets is attractive or repulsive.</li> <li>The presence of a magnet and the force the magnet exerts on other objects.</li> <li>Electrically charged objects and an electric force.</li> </ul> </li> <li>Students' questions can be investigated within the scope of the classroom.</li> </ul>

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

**Performance Expectation**

**3-PS2-4-** Define a simple design problem that can be solved by applying scientific ideas about magnets.\* [Clarification Statement: Examples of problems could include constructing a latch to keep a door shut and creating a device to keep two moving objects from touching each other.]

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
--	--------------------------------

**Asking Questions and Defining Problems-**

- Define a simple problem that can be solved through the development of a new or improved object or tool.

**PS2.B: Types of Interactions-**

- Electric and magnetic forces between a pair of objects do not require that the objects be in contact. The sizes of the forces in each situation depend on the properties of the objects and their distances apart and, for forces between two magnets, on their orientation relative to each other.

<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
------------------------------	----------------------------

**Interdependence of Science, Engineering, and Technology-**

- Scientific discoveries about the natural world can often lead to new and improved technologies, which are developed through the engineering design process.

- Students identify and describe a simple design problem that can be solved by applying a scientific understanding of the forces between interacting magnets.
- Students identify and describe the scientific ideas necessary for solving the problem, including:
  - Force between objects do not require that those objects be in contact with each other
  - The size of the force depends on the properties of objects, distance between the objects, and orientation of magnetic objects relative to one another.
- Students identify and describe the criteria (desirable features) for a successful solution to the problem.
- Students identify and describe the constraints.

**Primary Interdisciplinary Connections:**

- ELA: SL.3.3. Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
- Engineering Units are embedding throughout

**Grade: 3rd Grade**

**Content Area: Science**

**Technology Standards:**

- 8.1.2.A.1 Identify the basic features of a digital device and explain its purpose.
- 8.1.2.A.4 Demonstrate developmentally appropriate navigation skills in virtual environments (i.e. games, museums).
- 8.2.2.C.1 Brainstorm ideas on how to solve a problem or build a product
- 8.1.2.E.1 Use digital tools and online resources to explore a problem or issue.
- 8.2.2.E.1 List and demonstrate the steps to an everyday task

**Career Ready Practices:**

- CRP1. Act as a responsible and contributing citizen and employee.
- CRP4. Communicate clearly and effectively and with reason.
- CRP12. Work productively in teams while using cultural global competence.

**21st Century Life and Career Standards:**

- 9.1.4.A.1- Explain the difference between a career and a job, and identify various jobs in the community and the related earnings.

**Suggested Accommodations**

**English Language Learners:**

- Provide pictures and well labeled models
- Speak slowly and gesture when necessary
- Pre-teach vocabulary words
- Extended time on assessments
- Small group for assessment
- Review Vocabulary
- Allow for alternate responses during activities and assessments

**Special Education/Students with Disabilities:**

- Follow specific IEP accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**504 Plans:**

- Follow specific 504 accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**Gifted and Talented:**

- Open ended questions to activate higher level thinking
- Higher level texts
- Alternative modes of communication
- Student developed extension activities

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

- Plan self directed inquiry
- Student created rubrics
- Curriculum compacting
- Opportunities to push assessment/activity boundaries

### **Students at Risk of Failure:**

- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Incorporate social/emotional discussions
- Encourage and monitor positive peer collaboration
- Provide academic resources for both home and school use
- Provide incentives to increase motivation and collaboration

### **Economically Disadvantaged:**

- Provide clear, achievable expectation, do not lower academic requirements for them.
- Build a safe and nurturing atmosphere
- Be flexible with assignments
- Offer several alternatives from which all students can choose.
- Allow students to finish assignments independently, or give them the opportunity to complete tasks at their own pace.
- Use real-world examples and create mental models for abstract idea
- Provide increased knowledge base and vocabulary use about real world experiences.
- Share the decision making in class.
- Maintain expectations while offering choice and soliciting input

### **Culturally Diverse:**

- Involve families in student learning
- Provide social/emotional support
- Respect cultural traditions
- Build in more group work to encourage interaction with peers
- Show photos, videos, and definitions when possible for culturally unique vocabulary
- Teach study skills
- Provided students with necessary academic resources and materials
- Allow for alternative assignments
- Provide visuals
- Assign peer tutor
- Support verbal explanations with non verbal cues: Gestures/ facial expressions Props, realia, manipulatives, concrete materials Visuals, graphs, pictures, maps
- Provide positive praise to increase motivation
- Provide real world connections and emphasize the value of education
- Communicate high expectations for the success of all students

## **Evidence of Student Learning**

### **Formative Tasks:**

- Embedded Formative Tasks p. 527: Lessons 1.3-5.2 (Teacher references)

### **Alternative Assessments:**

- Student Self-Assessment pg 525 (teacher references)

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

**Summative Assessments:**

- End of the unit assessment: Students End of unit explanations
- Investigative assessments
- Critical Juncture Assessments
- Graphic Organizers & Guided Note Taking
- Cooperative Group Learning

**Benchmark Assessments:**

- Group Work/Class Discussion
- Rubric Guided Observations
- Question Starters
- Modified Tests/Quizzes/Classwork

**Knowledge & Skills**

**Enduring Understandings:**

- The effect of unbalanced forces on an object results in a change of motion.
- Patterns of motion can be used to predict future motion. Some forces act through contact, some forces act even when objects are not in contact.
- The gravitational force of Earth acting on an object near Earth’s surface pulls that object toward the planet’s center.
- The effect of unbalanced forces on an object results in a change of motion.
- Patterns of motion can be used to predict future motion.
- Some forces act through contact, some forces act even when objects are not in contact.

**Essential Questions:**

- What are the effects of balanced and unbalanced forces on the motion of an object?
- How can you utilize a pattern to predict future motion?
- What is the relationship between electric or magnetic interactions between two objects not in contact?
- How can I solve a design problem using what I have learned about magnet?
- What are the effects of balanced and unbalanced forces on the motion of an object?
- How can you utilize a pattern to predict future motion?
- What is the relationship between electric or magnetic interactions between two objects not in contact?
- How can I solve a design problem using what I have learned about magnets?

**Core Instructional & Supplemental Materials**

**Suggested Activities/Resources:**

- Hands on activities embedded within Amplify Science Lessons.
- Students will explore motion by simulating a push with a golf ball and pencil. Using a graphic organizer, students will record their data on a table and relay the information to class table by the end of the experiment. Students will observe forces and motion, as well as how much force is required to move an object.
- <https://betterlesson.com/lesson/632779/force-and-motioninvestigation8>

**Varied Levels of Text:**

- Forces All Around
- Handbook of Forces
- What My Sister Taught Me About Magnets
- Hoverboard
- Schoolwide mentor texts “Forces and Motion” unit
- Forces Make Things Move-Kimberly Bradley
- Gravity is a Mystery-Franklyn Branley
- Waking Upside Down-Phillip Heckman
- Move It! Motion, Forces, and You- Adrienne Mason

## Beach Haven School District Curriculum Guide

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

<ul style="list-style-type: none"> <li>● Students will rub a balloon against shirt which builds up negative charges on the surface of the balloon. These charges attract to the positive charges on the static ghost, causing the ghost to move. *great activity to teach around Halloween.</li> <li>● <a href="http://www.hookedonscience.org/files/2015_Experiment_Archive_STATIC_ELECTRICITY_GHOST.pdf">http://www.hookedonscience.org/files/2015_Experiment_Archive_STATIC_ELECTRICITY_GHOST.pdf</a></li> <li>● Students will add blocks to a structure which allows the center of gravity, of your structure, to shift from right to left. Once you remove the bottom vertical block, your structure perfectly balances over the bottom left block. Students can also demonstrate this idea with “Jenga” blocks.</li> <li>● <a href="http://www.hookedonscience.org/files/2017_Experiment_Archive_Block_Balance.pdf">http://www.hookedonscience.org/files/2017_Experiment_Archive_Block_Balance.pdf</a></li> </ul>

<b>Unit 3: Life Cycles &amp; Inherited Traits</b>	<b>Duration: 40 days- ongoing</b>
---	-----------------------------------

<b>Standards/Learning Targets</b>
-----------------------------------

<p><b>New Jersey Student Learning Standards:</b></p> <ul style="list-style-type: none"> <li>● <b>3-LS1-1-</b> Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death</li> <li>● <b>3-LS3-1-</b> Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms</li> <li>● <b>3-LS3-2-</b> Use evidence to support the explanation that traits can be influenced by the environment</li> <li>● <b>3-LS4-2 -</b> Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing</li> </ul>
--

<b>Performance Expectation</b>
--------------------------------

**3-LS1-1-** Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death. [Clarification Statement: Changes organisms go through during their life form a pattern.] [Assessment Boundary: Assessment of plant life cycles is limited to those of flowering plants. Assessment does not include details of human reproduction.]

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
<p><b>Developing and Using Models-</b></p> <ul style="list-style-type: none"> <li>● Develop models to describe phenomena.</li> </ul> <p><b>Scientific Knowledge is Based on Empirical Evidence-</b></p>	<p><b>LS1.B: Growth and Development of Organisms-</b></p> <ul style="list-style-type: none"> <li>● Reproduction is essential to the continued existence of every kind of organism. Plants</li> </ul>

-------------------------	------------------------------

<ul style="list-style-type: none"> <li>Science findings are based on recognizing patterns.</li> </ul>	<p>and animals have unique and diverse life cycles.</p>
Crosscutting Concepts	Learning Objectives
<p><b>Patterns-</b></p> <ul style="list-style-type: none"> <li>Patterns of change can be used to make predictions.</li> </ul>	<ul style="list-style-type: none"> <li>Students develop models (e.g., conceptual, physical, drawing) to describe the phenomenon. In their models, students identify the relevant components of their models.</li> <li>In the models, students describe relationships between components.</li> <li>Students use the models to describe that although organisms can display life cycles that look different, they all follow the same pattern.</li> <li>Students use the models to make predictions related to the phenomenon, based on patterns identified among life cycles (e.g., prediction could include that if there are no births, deaths will continue and eventually there will be no more of that type of organism).</li> </ul>

Performance Expectation
-------------------------

**3-LS3-1-** Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms. [Clarification Statement: Patterns are the similarities and differences in traits shared between offspring and their parents, or among siblings. Emphasis is on organisms other than humans.] [Assessment Boundary: Assessment does not include genetic mechanisms of inheritance and prediction of traits. Assessment is limited to non-human examples.]

Science and Engineering Practices	Disciplinary Core Ideas
-----------------------------------	-------------------------

<p><b>Analyzing and Interpreting Data-</b></p> <ul style="list-style-type: none"> <li>Analyze and interpret data to make sense of phenomena using logical reasoning</li> </ul>	<p><b>LS3.A: Inheritance of Traits-</b></p> <ul style="list-style-type: none"> <li>Many characteristics of organisms are inherited from their parents.</li> </ul> <p><b>LS3.B: Variation of Traits-</b></p> <ul style="list-style-type: none"> <li>Different organisms vary in how they look and function because they have different inherited information.</li> </ul>
--	---

Crosscutting Concepts	Learning Objectives
-----------------------	---------------------

<ul style="list-style-type: none"> <li><b>Patterns:</b> similarities and differences in patterns can be used to sort and classify</li> </ul>	<ul style="list-style-type: none"> <li>Students organize the data (e.g., from students' previous work,</li> </ul>

-------------------------	------------------------------

<p>natural phenomena.</p>	<p>grade-appropriate existing datasets) using graphical displays (e.g., table, chart, graph).</p> <ul style="list-style-type: none"> <li>• Students identify and describe patterns in the data.</li> <li>• Students describe that the pattern of similarities in traits between parents and offspring, and between siblings, provides evidence that traits are inherited.</li> <li>• Students describe that the pattern of differences in traits between parents and offspring, and between siblings, provides evidence that inherited traits can vary.</li> <li>• Students describe that the variation in inherited traits results in a pattern of variation in traits in groups of organisms that are of a similar type.</li> </ul>
---------------------------	---

<b>Performance Expectation</b>
--------------------------------

**3-LS3-2-** Use evidence to support the explanation that traits can be influenced by the environment. [Clarification Statement: Examples of the environment affecting a trait could include normally tall plants grown with insufficient water are stunted; and, a pet dog that is given too much food and little exercise may become overweight.]

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
--	--------------------------------

**Constructing Explanations and Designing Solutions-**

- Use evidence (e.g., observations, patterns) to support an explanation.

**LS3.A: Inheritance of Traits-**

- Other characteristics result from individuals' interactions with the environment, which can range from diet to learning. Many characteristics involve both inheritance and environment.

**LS3.B: Variation of Traits-**

- The environment also affects the traits that an organism develops.

<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
------------------------------	----------------------------

**Cause and Effect-**

- Cause and effect relationships are routinely identified and used to explain change.

- Students identify the given explanation to be supported, including a statement that relates the phenomenon to a scientific idea, including that many inherited traits can be influenced by the environment.

Beach Haven School District Curriculum Guide

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

	<ul style="list-style-type: none"> <li>● Students describe the given evidence that supports the explanation, including:             <ul style="list-style-type: none"> <li>○ Environmental factors that vary for organisms of the same type (e.g., amount of food, amount of water, amount of exercise an animal gets, chemicals in the water) that may influence organisms' traits.</li> <li>○ Inherited traits that vary between organisms of the same type (e.g., height or weight of a plant or animal, color or quantity of the flowers).</li> <li>○ Observable inherited traits of organisms in varied environmental conditions</li> </ul> </li> <li>● Students use reasoning to connect the evidence and support an explanation about environmental influences on inherited traits in organisms. In their chain of reasoning, students describe a cause and effect relationship between a specific causal environmental factor and its effect of a given variation in a trait (e.g., not enough water produces plants that are shorter and have fewer flowers than plants that had more water available).</li> </ul>
--	---

<b>Performance Expectation</b>
--------------------------------

**3-LS4-2-** Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing. [Clarification Statement: Examples of cause and effect relationships could be plants that have larger thorns than other plants may be less likely to be eaten by predators; and, animals that have better camouflage coloration than other animals may be more likely to survive and therefore more likely to leave offspring.]

Students describe a chain of reasoning.</li> </ul>

**Primary Interdisciplinary Connections:**

- ELA: SL.3.3. Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
- Engineering Units are embedding throughout

**Technology Standards:**

- 8.1.2.A.1 Identify the basic features of a digital device and explain its purpose.
- 8.1.2.A.4 Demonstrate developmentally appropriate navigation skills in virtual environments (i.e. games, museums).
- 8.2.2.C.1 Brainstorm ideas on how to solve a problem or build a product
- 8.1.2.E.1 Use digital tools and online resources to explore a problem or issue.
- 8.2.2.E.1 List and demonstrate the steps to an everyday task

**Career Ready Practices:**

- CRP1. Act as a responsible and contributing citizen and employee.
- CRP4. Communicate clearly and effectively and with reason.
- CRP12. Work productively in teams while using cultural global competence.

**21st Century Life and Career Standards:**

- 9.1.4.A.1- Explain the difference between a career and a job, and identify various jobs in the community and the related earnings.

Grade: 3rd Grade

Content Area: Science

**Suggested Accommodations**

**English Language Learners:**

- Provide pictures and well labeled models
- Speak slowly and gesture when necessary
- Pre-teach vocabulary words
- Extended time on assessments
- Small group for assessment
- Review Vocabulary
- Allow for alternate responses during activities and assessments

**Special Education/Students with Disabilities:**

- Follow specific IEP accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**504 Plans:**

- Follow specific 504 accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**Gifted and Talented:**

- Open ended questions to activate higher level thinking
- Higher level texts
- Alternative modes of communication
- Student developed extension activities
- Plan self directed inquiry
- Student created rubrics
- Curriculum compacting
- Opportunities to push assessment/activity boundaries

**Students at Risk of Failure:**

- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Incorporate social/emotional discussions
- Encourage and monitor positive peer collaboration
- Provide academic resources for both home and school use
- Provide incentives to increase motivation and collaboration

**Economically Disadvantaged:**

- Provide clear, achievable expectation, do not lower academic requirements for them.
- Build a safe and nurturing atmosphere
- Be flexible with assignments
- Offer several alternatives from which all students can choose.

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

- Allow students to finish assignments independently, or give them the opportunity to complete tasks at their own pace.
- Use real-world examples and create mental models for abstract idea
- Provide increased knowledge base and vocabulary use about real world experiences.
- Share the decision making in class.
- Maintain expectations while offering choice and soliciting input

**Culturally Diverse:**

- Involve families in student learning
- Provide social/emotional support
- Respect cultural traditions
- Build in more group work to encourage interaction with peers
- Show photos, videos, and definitions when possible for culturally unique vocabulary
- Teach study skills
- Provided students with necessary academic resources and materials
- Allow for alternative assignments
- Provide visuals
- Assign peer tutor
- Support verbal explanations with non verbal cues: Gestures/ facial expressions Props, realia, manipulatives, concrete materials Visuals, graphs, pictures, maps
- Provide positive praise to increase motivation
- Provide real world connections and emphasize the value of education
- Communicate high expectations for the success of all students

### Evidence of Student Learning

**Formative Tasks:**

- Embedded Formative Tasks (Teacher references)

**Alternative Assessments:**

- Student Self-Assessment (teacher references)

**Summative Assessments:**

- End of the unit assessment: Students End of unit explanations
- Investigative assessments
- Critical Juncture Assessments
- Graphic Organizers & Guided Note Taking
- Cooperative Group Learning

**Benchmark Assessments:**

- Group Work/Class Discussion
- Rubric Guided Observations
- Question Starters
- Modified Tests/Quizzes/Classwork

### Knowledge & Skills

**Enduring Understandings:**

- Reproduction is essential to every kind of organism.
- Organisms have unique and diverse life cycles.
- Different organisms vary in how they look and function because they have different inherited information.

**Essential Questions:**

- What are the components of life cycles that all organisms share, and how do they differ?
- Do all plant and animal offspring inherit the same traits?

## Beach Haven School District Curriculum Guide

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

<ul style="list-style-type: none"> <li>● The environment also affects the traits that an organism develops.</li> </ul>	<ul style="list-style-type: none"> <li>● How are traits influenced by the environment?</li> <li>● How do variations and characteristics provide advantages in nature?</li> </ul>

Grade: 3rd Grade

Content Area: Science

**21st Century Life and Career Standards:**

- 9.1.4.A.1- Explain the difference between a career and a job, and identify various jobs in the community and the related earnings.

**Suggested Accommodations**

**English Language Learners:**

- Provide pictures and well labeled models
- Speak slowly and gesture when necessary
- Pre-teach vocabulary words
- Extended time on assessments
- Small group for assessment
- Review Vocabulary
- Allow for alternate responses during activities and assessments

**Special Education/Students with Disabilities:**

- Follow specific IEP accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**504 Plans:**

- Follow specific 504 accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**Gifted and Talented:**

- Open ended questions to activate higher level thinking
- Higher level texts
- Alternative modes of communication
- Student developed extension activities
- Plan self directed inquiry
- Student created rubrics
- Curriculum compacting
- Opportunities to push assessment/activity boundaries

**Students at Risk of Failure:**

- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Incorporate social/emotional discussions
- Encourage and monitor positive peer collaboration
- Provide academic resources for both home and school use
- Provide incentives to increase motivation and collaboration

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

**Economically Disadvantaged:**

- Provide clear, achievable expectation, do not lower academic requirements for them.
- Build a safe and nurturing atmosphere
- Be flexible with assignments
- Offer several alternatives from which all students can choose.
- Allow students to finish assignments independently, or give them the opportunity to complete tasks at their own pace.
- Use real-world examples and create mental models for abstract idea
- Provide increased knowledge base and vocabulary use about real world experiences.
- Share the decision making in class.
- Maintain expectations while offering choice and soliciting input

**Culturally Diverse:**

- Involve families in student learning
- Provide social/emotional support
- Respect cultural traditions
- Build in more group work to encourage interaction with peers
- Show photos, videos, and definitions when possible for culturally unique vocabulary
- Teach study skills
- Provided students with necessary academic resources and materials
- Allow for alternative assignments
- Provide visuals
- Assign peer tutor
- Support verbal explanations with non verbal cues: Gestures/ facial expressions Props, realia, manipulatives, concrete materials Visuals, graphs, pictures, maps
- Provide positive praise to increase motivation
- Provide real world connections and emphasize the value of education
- Communicate high expectations for the success of all students

### Evidence of Student Learning

**Formative Tasks:**

- Embedded Formative Tasks p. 527: Lessons 1.3-5.2 (Teacher references)

**Alternative Assessments:**

- Student Self-Assessment pg 525 (teacher references)

**Summative Assessments:**

- End of the unit assessment: Students End of unit explanations
- Investigative assessments
- Critical Juncture Assessments
- Graphic Organizers & Guided Note Taking
- Cooperative Group Learning

**Benchmark Assessments:**

- Group Work/Class Discussion
- Rubric Guided Observations
- Question Starters
- Modified Tests/Quizzes/Classwork

### Knowledge & Skills

# Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

## Enduring Understandings:

- When the environment changes, some organisms survive and reproduce, some move to new locations, some move into the transformed environment, and some die.
- Being part of a group helps animals obtain food, defend themselves, and cope with changes.
- Some living organisms resemble organisms that once lived on Earth. Fossils provide evidence about the types of organisms and environments that existed long ago.
- Differences in characteristics between individuals of the same species provide advantages in surviving and reproducing.
- Particular organisms can only survive in particular environments.
- Populations of organisms live in a variety of habitats. Change in those habitats affects the organisms living there.

## Essential Questions:

- Why do some animals form groups to help members survive?
- How do fossils provide evidence of the organisms and the environments in which they lived long ago?
- How does the chosen habitat affect the survival rate of its inhabitants?
- Why do plants and animals change when their environment changes?
- What are some solutions to some problems that are caused by environmental changes?
- What is the impact of these changes up on plants and animals?

## Core Instructional & Supplemental Materials

### Suggested Activities/Resources:

- Hands on activities embedded within Amplify Science Lessons.
- Students use BrainPOP Jr. and/or BrainPOP resources to identify the roles that plants and animals play in various food chains during interactive game play. Students define vocabulary terms such as decomposer and producer and use those terms in class discussions and activities.  
<https://educators.brainpop.com/lesson-plan/plantsanimals-lesson-plan-food-chain-game/?bptopic=ecosystems>
- Students use BrainPOP resources to explore the relationships between organisms within an ecosystem. Students then build a virtual food web to support a selected animal using online game play.  
<https://educators.brainpop.com/lesson-plan/food-fightgame-food-chains/?bp-topic=ecosystems>
- What is the growth and development of a plant? Each student has a lima bean and a hand lens. Have them make detailed

### Varied Levels of Text:

- Earthworms Underground
- Mystery Mouths
- Environment News
- Cockroach Robots
- Biomimicry Handbook
- Over and Under the Pond- Kate Messner
- Seashore- Steve Parker
- A Walk in the Rainforest- Rebecca L. Johnson
- Swamp- Donald Silver

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

<p>diagrams and chart their observations of the lima bean. Soak Lima beans, hand lens, paper towels, graphic organizer for modeling diagram 26 the lima beans in water overnight. Have students take apart the lima bean. Again, create a detailed diagram of the parts. Goal: students to be able to identify the parts of the seed and determine the development of the seed into a plant.</p> <ul style="list-style-type: none"> <li>● Using quick germinating seeds, have the students plant them. Have them plant and observe and measure the plant's in order to track the data of the plants. Students are able to create a graph of their plant growth. (Dixie cups, potting soil, quick germinating seeds, chart for tracking)</li> <li>● Plant Dissection: Draw a detailed diagram of the entire plant. Students are to dissect the flower to have a better understanding of the parts. Have them record and label each part. Using a ruler, measure the exact length of the flower. (ex. daffodils, lilies, iris, tulips work best) Students can glue the pieces of the plant into their science journal. Tulips, lilies, daffodils, iris (or any other large-stemmed flower), plastic knife (for teacher-use only), rulers, charts.</li> </ul>	
--	--

<b>Unit 5: Weather and Climate</b>	<b>Duration: 30 days- ongoing</b>
------------------------------------	-----------------------------------

<b>Standards/Learning Targets</b>
-----------------------------------

<p><b>New Jersey Student Learning Standards:</b></p> <ul style="list-style-type: none"> <li>● <b>3-ESS2-1-</b> Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season</li> <li>● <b>3-ESS2-2-</b> Obtain and combine information to describe climates in different regions of the world</li> <li>● <b>3-ESS3.1-</b> Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard</li> </ul>
---

<b>Performance Expectation</b>
--------------------------------

<p><b>3-ESS2-1-</b> Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season. [Clarification Statement: Examples of data could include average temperature, precipitation, and wind direction.] [Assessment Boundary: Assessment of graphical displays is limited to pictographs and bar graphs. Assessment does not include climate change.]</p>
---

**Beach Haven School District Curriculum Guide**

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
<p><b>Analyzing and Interpreting Data-</b></p> <ul style="list-style-type: none"> <li>Represent data in tables and various graphical displays (bar graphs and pictographs) to reveal patterns that indicate relationships</li> </ul>	<p><b>ESS2.D: Weather and Climate-</b></p> <ul style="list-style-type: none"> <li>Scientists record patterns of the weather across different times and areas so that they can make predictions about what kind of weather might happen next.</li> </ul>
<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
<p><b>Patterns-</b></p> <ul style="list-style-type: none"> <li>Patterns of change can be used to make predictions.</li> </ul>	<ul style="list-style-type: none"> <li>Students use graphical displays (e.g., table, chart, graph) to organize the given data by season using tables, pictographs, and/or bar charts, including:                             <ul style="list-style-type: none"> <li>Weather condition data from the same area across multiple seasons (e.g., average temperature, precipitation, wind direction).</li> <li>Weather condition data from different areas (e.g., hometown and nonlocal areas, such as a town in another state).</li> </ul> </li> <li>Students identify and describe patterns of weather conditions across:                             <ul style="list-style-type: none"> <li>Different seasons (e.g., cold and dry in the winter, hot and wet in the summer; more or less wind in a particular season).</li> <li>Different areas (e.g., certain areas (defined by location, such as a town in the Pacific Northwest), have high precipitation, while a different area (based on location or type, such as a town in the Southwest) have very little precipitation).</li> </ul> </li> </ul>

**Performance Expectation**

**3-ESS2-2-** Obtain and combine information to describe climates in different regions of the world.

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
<p><b>Obtaining, Evaluating, and Communicating Information-</b></p> <ul style="list-style-type: none"> <li>Obtain and combine information from books and other reliable media to explain</li> </ul>	<p><b>Weather and Climate-</b></p> <ul style="list-style-type: none"> <li>Climate describes a range of an area's typical weather conditions and the extent to which those conditions vary over years.</li> </ul>

**Beach Haven School District Curriculum Guide**

<b>Grade: 3rd Grade</b>	<b>Content Area: Science</b>
-------------------------	------------------------------

<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
<p>phenomena.</p> <p><b>Patterns-</b></p> <ul style="list-style-type: none"> <li>Patterns of change can be used to make predictions.</li> </ul>	<ul style="list-style-type: none"> <li>Students use books and other reliable media to gather information about:             <ul style="list-style-type: none"> <li>Climates in different regions of the world (e.g., equatorial, polar, coastal, mid-continental).</li> <li>Variations in climates within different regions of the world (e.g., variations could include an area’s average temperatures and precipitation during various months over several years or an area’s average rainfall and temperatures during the rainy season over several years).</li> </ul> </li> <li>Students combine obtained information to provide evidence about the climate pattern in a region that can be used to make predictions about typical weather conditions in that region.</li> </ul>

<b>Performance Expectation</b>
--------------------------------

**3-ESS3-1-** Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.\* [Clarification Statement: Examples of design solutions to weather-related hazards could include barriers to prevent flooding, wind resistant roofs, and lightning rods.]

<b>Science and Engineering Practices</b>	<b>Disciplinary Core Ideas</b>
<p><b>Engaging in Argument from Evidence-</b></p> <ul style="list-style-type: none"> <li>Make a claim about the merit of a solution to a problem by citing relevant evidence about how it meets the criteria and constraints of the problem.</li> </ul>	<p><b>ESS3.B: Natural Hazards-</b></p> <ul style="list-style-type: none"> <li>A variety of natural hazards result from natural processes. Humans cannot eliminate natural hazards but can take steps to reduce their impacts. (Note: This Disciplinary Core Idea is also addressed by 4- ESS3-2.)</li> </ul>
<b>Crosscutting Concepts</b>	<b>Learning Objectives</b>
<p><b>Cause and Effect-</b></p> <ul style="list-style-type: none"> <li>Cause and effect relationships are routinely identified, tested, and used to explain change.</li> </ul>	<ul style="list-style-type: none"> <li>Students make a claim about the merit of a given design solution that reduces the impact of a weather-related hazard.</li> <li>Students describe the given evidence about</li> </ul>

# Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

## **Connections to Engineering, Technology, and Applications of Science-**

- Engineers improve existing technologies or develop new ones to increase their benefits (e.g., better artificial limbs), decrease known risks (e.g., seatbelts in cars), and meet societal demands (e.g., cell phones).

## **Connections to Nature of Science-**

- Science is a Human Endeavor Science affects everyday life.

the design solution, including evidence about:

- The given weather-related hazard (e.g., heavy rain or snow, strong winds, lightning, flooding along river banks).
- Problems caused by the weather related hazard (e.g., heavy rains cause flooding, lightning causes fires).
- How the proposed solution addresses the problem (e.g., dams and levees are designed to control flooding, lightning rods reduce the chance of fires) [note: mechanisms are limited to simple observable relationships that rely on logical reasoning]

## **Primary Interdisciplinary Connections:**

- ELA: SL.3.3. Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
- Engineering Units are embedding throughout

## **Technology Standards:**

- 8.1.2.A.1 Identify the basic features of a digital device and explain its purpose.
- 8.1.2.A.4 Demonstrate developmentally appropriate navigation skills in virtual environments (i.e. games, museums).
- 8.2.2.C.1 Brainstorm ideas on how to solve a problem or build a product
- 8.1.2.E.1 Use digital tools and online resources to explore a problem or issue.
- 8.2.2.E.1 List and demonstrate the steps to an everyday task

## **Career Ready Practices:**

- CRP1. Act as a responsible and contributing citizen and employee.
- CRP4. Communicate clearly and effectively and with reason.
- CRP12. Work productively in teams while using cultural global competence.

## **21st Century Life and Career Standards:**

- 9.1.4.A.1- Explain the difference between a career and a job, and identify various jobs in the community and the related earnings.

## **Suggested Accommodations**

### **English Language Learners:**

- Provide pictures and well labeled models

- Speak slowly and gesture when necessary
- Pre-teach vocabulary words
- Extended time on assessments
- Small group for assessment
- Review Vocabulary
- Allow for alternate responses during activities and assessments

**Special Education/Students with Disabilities:**

- Follow specific IEP accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**504 Plans:**

- Follow specific 504 accommodations and modifications
- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Allow alternate assignments and assessments

**Gifted and Talented:**

- Open ended questions to activate higher level thinking
- Higher level texts
- Alternative modes of communication
- Student developed extension activities
- Plan self directed inquiry
- Student created rubrics
- Curriculum compacting
- Opportunities to push assessment/activity boundaries

**Students at Risk of Failure:**

- Strategic grouping
- Pre-teach concepts
- Small group for assessments
- Check in's during experiments to help refocus
- Incorporate social/emotional discussions
- Encourage and monitor positive peer collaboration
- Provide academic resources for both home and school use
- Provide incentives to increase motivation and collaboration

**Economically Disadvantaged:**

- Provide clear, achievable expectation, do not lower academic requirements for them.
- Build a safe and nurturing atmosphere
- Be flexible with assignments
- Offer several alternatives from which all students can choose.
- Allow students to finish assignments independently, or give them the opportunity to complete tasks at their own pace.
- Use real-world examples and create mental models for abstract idea
- Provide increased knowledge base and vocabulary use about real world experiences.

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

- Share the decision making in class.
- Maintain expectations while offering choice and soliciting input

**Culturally Diverse:**

- Involve families in student learning
- Provide social/emotional support
- Respect cultural traditions
- Build in more group work to encourage interaction with peers
- Show photos, videos, and definitions when possible for culturally unique vocabulary
- Teach study skills
- Provided students with necessary academic resources and materials
- Allow for alternative assignments
- Provide visuals
- Assign peer tutor
- Support verbal explanations with non verbal cues: Gestures/ facial expressions Props, realia, manipulatives, concrete materials Visuals, graphs, pictures, maps
- Provide positive praise to increase motivation
- Provide real world connections and emphasize the value of education
- Communicate high expectations for the success of all students

### Evidence of Student Learning

**Formative Tasks:**

- Embedded Formative Tasks p. 527: Lessons 1.3-5.2 (Teacher references)

**Alternative Assessments:**

- Student Self-Assessment pg 525 (teacher references)

**Summative Assessments:**

- End of the unit assessment: Students End of unit explanations
- Investigative assessments
- Critical Juncture Assessments
- Graphic Organizers & Guided Note Taking
- Cooperative Group Learning

**Benchmark Assessments:**

- Group Work/Class Discussion
- Rubric Guided Observations
- Question Starters
- Modified Tests/Quizzes/Classwork

### Knowledge & Skills

**Enduring Understandings:**

- Climate describes patterns of typical weather conditions over different scales and variations.
- Data in tables and graphical displays to describe typical weather conditions.
- Weather patterns can be analyzed.
- Solutions can be designed to reduce the impact of a weather-related hazard.

**Essential Questions:**

- How do seasonal changes affect weather conditions?
- How can I use data in tables and graphical displays to describe typical weather conditions?
- How does the global location of a region determine the climate?
- How do engineers design a solution to reduce the impact of a weather-related hazard?

Grade: 3rd Grade

Content Area: Science

**Core Instructional & Supplemental Materials**

**Suggested Activities/Resources:**

- Hands on activities embedded within Amplify Science Lessons.
- Students will record the humidity for your location from [www.weather.gov](http://www.weather.gov) and whether the pinecone is open or closed each day. Represent your data in a table. After two weeks graph your data. What happens to the pinecone when the humidity is high? What happens to the pinecone when the humidity is low? Describe any weather patterns over the two weeks. Using the data describe the typical weather conditions expected during this time of the year.
- [http://www.hookedonscience.org/files/2015\\_Experiment\\_Archive\\_PINECONE\\_HYGROMETR.pdf34](http://www.hookedonscience.org/files/2015_Experiment_Archive_PINECONE_HYGROMETR.pdf34)
- In this activity, students will conduct experiments or participate in demonstrations to answer questions about sky and weather phenomena. Students also will analyze and present data.
- <http://www.earthsciweek.org/classroom-activities/skyand-cloud-windows>
- As a citizen scientist, students can take their own air temperatures with an outdoor thermometer and compare their readings to the official ones from the National Weather Service. It is important that you follow the correct procedures, however, for placing your thermometer. This activity will help students to do that, as well as find out what the normal yearly average temperature is for each day. <http://www.earthsciweek.org/classroom-activities/stepstep-weather-observations>
- This guide provides an overview of unit concepts, a spark activity, vocabulary list, Internet links, and extension activities. It describes unit resources and addresses misconceptions. Students will understand why it is clear one day and cloudy another day or why it is snowing in one location and sunny in another location.
- <https://www.scienceaz.com/main/Download/resource/saz/id/326/unitId/13/format/single>

**Varied Levels of Text:**

- Sky Notebook
- Seeing the World Through Numbers
- What's Going On with the Weather?
- Dangerous Weather Ahead
- World Weather Handbook
- Snowflake Bentley- Jacqueline Briggs Martin
- Hurricanes- Gail Gibbons
- Come On, Rain!- Karen Hesse
- Albert- Donna Jo Napoli

## Beach Haven School District Curriculum Guide

**Grade: 3rd Grade**

**Content Area: Science**

- Measure the change in temperature of objects when placed under lamps or in the sunlight. (Lamps or sunlight, glass of water, thermometer, chart paper, timer)
